

ABSTRACT OF THE DISCLOSURE

5

ISOCYANATE-BASED COMPOSITIONS, PROCESS FOR
USING THEM TO MAKE ADHESIVES, AND
AROMATIC GLUE JOINTS THUS OBTAINED

- 10 The invention relates to the use of an emulsifiable
isocyanate composition in adhesives. The composition
comprises an isocyanate composition with a mass content
of the $N=C=O$ function from 10 % to 30 % and a viscosity
of at most 1,500 mPa.s. and a detergent agent with a
15 main component of a compound or a mixture of compounds
containing phosphorous and ethylene oxide groups and an
oxygen atom carrying an anion. The above is of
application in the adhesive industry.
